Q.2. Write an API Reference Guide for the following details:

Method Name: list

Parameters:

- search string
- flight_number optional

Response:

The output is a JSON body.

```
{
  "flights": [
    {
      "name": "Airline Name",
      "flight_number": "243",
      "departure": "2008-01-10T11:00:00-05:00",
      "arrival": "2008-01-10T12:00:00-05:00",
      "from": "New York",
      "to": "California"
    }
  ]
}
```

Authentication Method: OAuth with OpenID

The document is intended for a third-party developer who would consume the API for an online travel service. The API is exposed by the airline company. Feel free to make assumptions and add information to your document. Ensure the guide is comprehensive.

Q.3. Write a step-by-step user guide to create and run a campaign on a social media platform to help a small business increase its customer engagement. Use your imagination, and you can describe using a use case. (500-700 words)

Q.4. Write the challenges you face as a Technical Writer and how you overcome them. We would like to learn more about your experience and how you have used your communication and decision-making skills to overcome the challenges. (300 words)

Q.5. Write a document that explains how to play Scribble/Pictionary. Your audiences are both children and adults. You can use your creativity here! We would like to see how you approach non-technical users. (300 words)
